

SURVEY METHODOLOGY – WOOD PACKAGING PROGRAM

The Board of review has directed the staff to conduct two 10% surveys (minimum of 10%) on each accredited wood packaging agency per year.

The procedures used to determine each survey for a wood packaging agency's performance are as follows:

-) A list of the current facilities using the services of an agency is requested from each agency accredited by the Board of Review.
-) The survey stops from the last five surveys are excluded.
-) From the remaining facilities 10% of the facilities are then selected using a computer program for random selecting without replacement.
